

I have to stay at home.

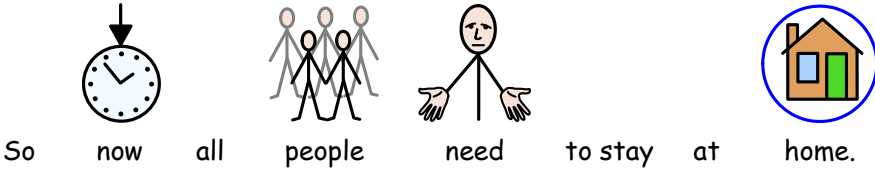

My favourite places are not open.

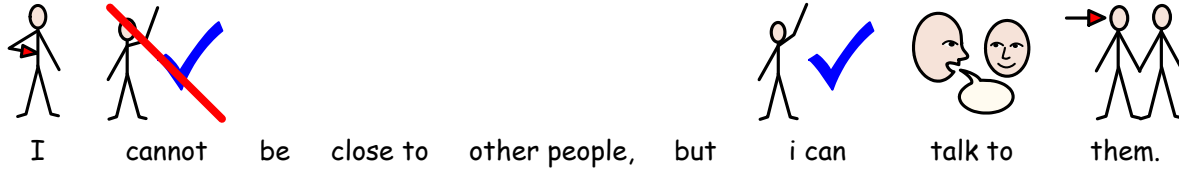

people are getting each other sick.

People do not get sick if they stay at home.

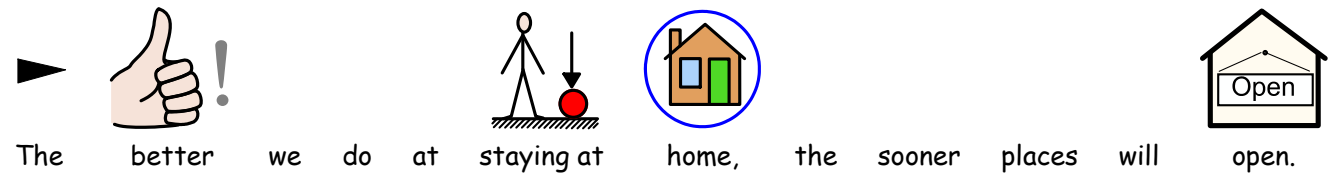

So now all people need to stay at home.

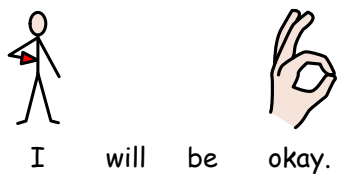

I cannot be close to other people, but i can talk to them.

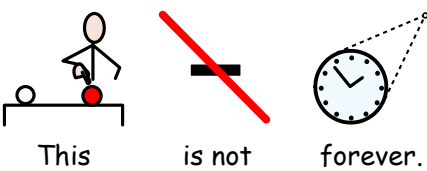

One day, when it is safe, everything will open again.

The better we do at staying at home, the sooner places will open.

I will be okay.

This is not forever.
