

Art Task

Shadow Drawing

Around your house find some of your favourite objects/toys. Take them outside into the sunshine or near a light source. Place them below some paper and draw around their outline. You can then decorate them with art materials that you have at home.

You could make a collage using different textiles. You could colour or paint or just leave it as the shadow outline.

I would love to see how you have chosen to represent your favourite objects. If you can take step-by-step photos to show your creative process that would be great!
