

# Weekly Chore Chart

A cut and stick chore chart to get your child helping out around the house. For each category (Task, Item, Area) there are various pictures. Cut these out and place on the chart to make a task. This is great as a sorting activity for your child too. Tell them the task you would like them to do, and get them to arrange the tiles to make it on the chart.

Included are blank panels so you can write your own specific activities.

Example -

| Helping Chart    | Task  | Item   | Area  |
