

Share this classic story with a wonderful digital enhancement. Using your compatible smart device, it will need to be augmented reality enabled, follow the instructions below and the Tiger can really come to tea!

Download Google Chrome to your device.

Search 'tiger'.

Click the 'view in 3D' button.

Click the 'view in your space' button.

This should show you the tiger prowling your room on your device's screen.

This works for some other animals too. Search lots of animals and see who visits your home. I'm sure you can find lots of animal related stories or revisit some old favourites and see if those animals are available to come to your house.

Some suggestions:
