

Cooking with Cherry class

Here is a recipe for chocolate cake you could make together as a family. Some of you really love playing with the ingredients, so you could have your own ingredients on a tray to explore with.

Chocolate Cake

4oz of self raising flour

4oz caster sugar

4oz butter/margarine

2 eggs

2 tablespoons of cocoa powder

Chocolate to melt on top

Method

Cream the sugar and butter together

Whisk the eggs together in a jug

Pour the egg in and add the flour and mix together

And 2 tablespoons of cocoa powder and mix

Add the mixture to a loaf tin/sandwich tray and cook on gas mark 4

(160C electric fan) for approx 35 minutes.

When the cake has cooled, melt some chocolate and drizzle it over the top.

Cut a slice and enjoy!

We would love to see some photos of you making it!
