

The Bear Necessities

Melting sweets makes a slime that smells and tastes delicious. Melted gummy bears end up more like a putty than a slime!

YOU WILL NEED

- * a few packs of gummy bears
- * cornflour
- * icing sugar

1

HOT!

Pick out all of the bears of your favourite colour. Put them in a bowl and ask an adult to microwave on full power for 10 seconds.

Repeat until they've all melted.

2

You will have a lovely, glassy, melted mixture, but watch out - it will be super-hot! Stir it carefully with a spoon, or ask a grown up to help.

TOP TIP!

The amount of cornflour and icing sugar needed depends on how many gummy bears you use. Start off with little spoonfuls and increase until you've got it just right. The cornflour stops the slime sticking to you, but the icing sugar keeps it tasting sweet!
