

Can you make slime?

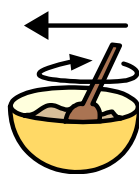

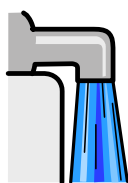

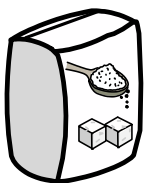

You could make your own alien slime to explore, hide objects in or mark make in.

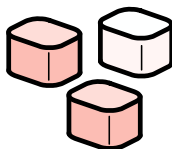

Here are some ideas of slime you could use;

Cornflour, water and food colouring to make a gloop

Icing sugar and water mixed together

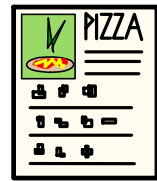

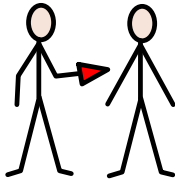

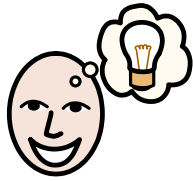

Melted marshmallows, make sure it has cooled before you play with

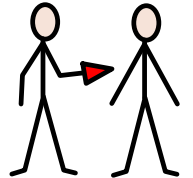

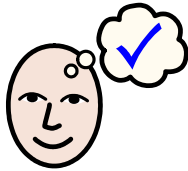

it - it will be sticky!

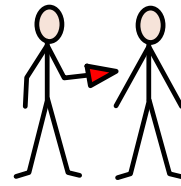

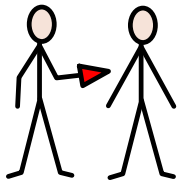

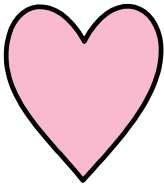

Make some jelly and play with it when it is set

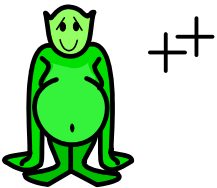

These are just ideas. You might have your own recipe for

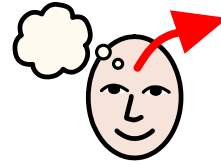

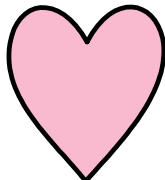

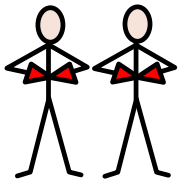

slime. Let us know what your slime felt like. Did you

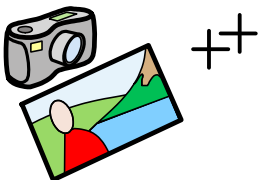

like it? Could you make marks in it? Did you find any

aliens in it?

We would love to see so please remember to send

us photos.
