

Impact report Primary PE and School Sport Premium 2019 – 2020

| Eligible pupils | | Amount received |
|--|---|-----------------------|
| 26 pupils - April 2019 – July 2019 | | £6,746 |
| 33 pupils - Sept. 2019 - March 2020 | | £9444 |
| | | Total: £16,190 |
| What the money will be spent on: | Intended impact | Cost |
| Specialist – sports coach | The specialist coach continued to provide good quality sports provision. A wide range of activities have happened throughout the year which have enabled the pupils to experience new sports both within school and the community. The 2 NQT's have been empowered to deliver sport to their classes in a sequenced and safe way. Unfortunately, the inter schools' events and sports day did not happen due to lockdown and the Coronavirus. | £2,640 |
| Specialist sports TA | The specialist TA continues to develop one to one provision within school. A multi health approach has ensured the pupils individual physical needs are met to support their physical management programme and sensory regulation. Rebound therapy and the use of the large indoor swing equipment has shown the importance of these targeted approaches. The 1:1 regulation has shown that pupils are more prepared for their learning as reported by the teachers. The 1:1 session are all linked with pupils' Individual education priorities. The rebound provision that started last year has been a huge success and the number of pupils being able to access it has increased. Both parents and the physiotherapists are reporting an increase in movement while class staff have reported high levels of engagement and interaction. | £9371 |
| Swimming and hydro therapy | All pupils, who wanted to, accessed either hydrotherapy or swimming up to March. The lead for swimming has been able to more effectively group pupils and they have all started different swimming routes. Two members of staff have trained as swim teachers and this is beginning to impact on the planning of more sequenced lessons. Two members of staff are also qualified to life save in shallow water (hydrotherapy) and this has strengthened the risk assessment around hydrotherapy as well as lessening the reliance on the physiotherapist. | £2,316.42 £1,200 |
| Trampoline | There is an up-to-date Risk Assessment and a group of staff have been trained to set the equipment up safely. The moving and handling team have completed individual plans to enable all pupils are safely hoisted on and off the trampoline. These are updated on at least an annual basis. Rebound therapy is promoting healthier muscular/skeletal systems, improved digestion and pupils are highly engaged in this activity. | £135 |
| Improve and extend outside play / PE equipment | There has been extensive work in the outdoor area to enable all pupils across the school to use the space. The work was completed in the summer term. All pupils access the space on a rota basis across the week and there has been increased engagement from older pupils with the introduction of the road where they can use bikes and scooters. The environment has been used to develop social skills such as turn taking and group play. The pupils use the space during breaks and leisure time but also in targeted 1:1 sessions. | £500 |
